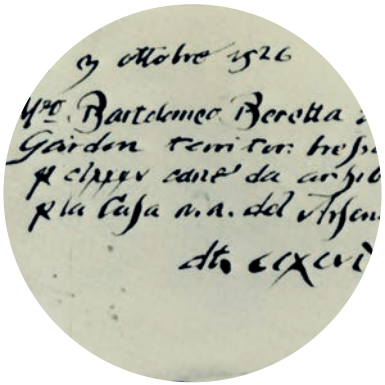
BERETTA

2025 **FIREARMS CATALOG**

Welcome to Beretta, where **500 years of tradition** meet the latest **technology.**

Beretta represents 500 years of refinement and professional excellence, thanks to the high standards of quality and constant innovation. We put all our heart, mind, expertise and will into it to always give you something new, surprisingly elegant and super reliable to enhance your shooting experience every time you use a Beretta firearm.



A tale **focused** on **experience** and **quality.**

It all began on October 3rd, 1526, when Mastro Bartolomeo Beretta from Gardone sold 185 harquebus barrels to the Venice Arsenal, receiving a payment of 296 ducats. Beretta's official start is evidenced in a small piece of paper, an "invoice" kept in the historical archives of Venice.

Today, the Beretta family has led the company for 15 generations and operates in support of outdoor and sport lovers, defense and law enforcement, providing them with firearms, clothing and accessories featuring the latest technology and the skill of expert craftsmen who have handed down the tradition of gunsmithing since the Renaissance.

HUNTING

Beretta **Tribe.**
The largest **family of hunters** that ever existed.

For some it's a gentlemen's hunt, for some it's hanging out with buddies. For some it's a big family, for some it's a crew. For some an after-work group, for some it's an alumni network. For some it's being immersed in nature, for some it's savoring its most authentic taste. For some it's a woman thing, for some a father and son thing.

For us, all these people together make up the #berettatribe, a community of hunters moved by a connection to nature and a proudly sustainable lifestyle.

Hunting is a passion we share with you. **Performance is a result we owe you.**

Our long expertise in hunting allowed us to create the best products for small, big and waterfowl hunters. Beretta guns combine the superior ballistics of Steelium® technology with 500 years of barrel-making experience, unmistakable design, reliable mechanisms, and the minimal maintenance requirements that made Beretta a world-renowned brand.

686 SILVER PIGEON I

For over 35 years, the Silver Pigeon has set the standard in the over&under crossover shotgun category, establishing itself as the epitome of excellence and reliability. The 2024 evolution of the 686 SPI is the best version of the Silver Pigeon I yet— an incremental upgrade that elevates the renowned Beretta field shotgun to new heights.
The innovative and smoother opening lever mechanism makes it easier to open and close the shotgun, together with the improved receiver balance and the polished stainless-steel trigger, it brings the Silver Pigeon into a new era of functionality. The richer and distinctive floral engraving Is featured for the first time on the receiver tail and is more intricately detailed on the hinge pins, covering all the metal surfaces seamlessly. The Silver Pigeon I incorporates the perfect ballistics of Beretta's highly reputed Steelium® Optimabore® HP barrels, for dense and uniform patterns and low recoil and muzzle rise.

687 Silver Pigeon III

687 Silver Pigeon III

687 SILVER PIGEON III

The 687 Silver Pigeon III shotgun represents an elegant evolution of the Silver Pigeon I, designed for shooters looking for the reliability and minimal maintenance requirements of the 680 platform, presented with attractive aesthetics and a superior wood finish. The fine game scene engraving is embellished by a special sparkle in the bas-relief areas for a pleasant contrast effect, while exquisite gloss finish enhances the grain of the stunning grade 2.5 wood, protects it from rain and improves longevity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels.

687 Silver Pigeon V

687 Silver Pigeon V

687 SILVER PIGEON V

The Silver Pigeon evolves with the V version: the efficiency, reliability and minimum maintenance requirements inherited from the 680 platform characterized by a new look together with a superior wood grade. The fine engravings are made using state-of-the-art premium laser technology and are embellished by a special sparkle in the bas-relief areas, which creates a pleasing contrast effect, highlighting the deep scroll motifs on the receiver, opening lever, trigger guard, locking shoulders, pins and forend release.

The exquisite gloss finish enhances the grain of the stunning grade 3 wood and protects it from rain and humidity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels. Available as Hunting or Sporting versions, the 687 Silver Pigeon V is the shotgun for those who like to stand out with a gun that never stopped evolving over the course of 30 years, becoming an icon of quality and elegance.

Ultraleggero Silver

Ultraleggero

The Ultraleggero begins a whole new chapter in the history of lightweight over&under shotguns, pushing the boundaries of design beyond all previous imagination; delivering the strength and reliability of a steel receiver but with an exceptionally low weight, something that had only previously been achieved with aluminum receivers. Thanks to the use of state-of-the-art engineering techniques, Beretta “skeletonised” the receiver and reduced weight in several components of the shotgun, including only the structural elements that are essential for the robustness, the performance and the balance of this shotgun. The result is a lightweight yet sturdy shotgun, ideal for hunters looking for a fast-handling gun that swiftly gets onto the game. Enjoy your hunt, gun weight will no longer be a burden.

687 EELL Diamond Pigeon

687 EELL Diamond Pigeon Game Scene

687 EELL Diamond Pigeon Scroll

The exceptionally strong, low-profile receiver is elegantly adorned with exquisite game scene or intricate scroll engravings, made with the best in class premium laser engraving technology. The stock and forend are superior quality walnut embellished with hand-cut chekering and lustrous gloss finish, demonstrating how improved performance and refined beauty can be perfectly matched. 687 EELL is assembled in Gardone Val Trompia, by the same skilled gunsmiths who work on Beretta fully customizable fine guns. If requested, every 687 EELL model can be equipped with a made-to-measure stock and provided in a factory pairs.

486 Parallelo

486

486 Color Case

486 EL

486 *Parallelo*

Built with a beautifully proportioned, scroll engraved, round body receiver, the 486 is a modern classic in the making. Using a modified demi-block design, Beretta's Triblock® system allows for a seamless barrel profile in the best English tradition whilst the V spring mechanism ensures fast, crisp trigger pulls. The 486 Parallelo underwent a full restyling with a new premium deep scroll engraving on the iconic round-body receiver, providing a fresh look to the Beretta all-time classic side-by-side.

B

The 9 reasons to choose the Beretta semi-auto technology.

01

PERFECT PATTERNS ON EVERY SHOT.

The ingredients of the great accuracy of the Beretta Steelium® barrels are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging process and the vacuum distension. Every Optima-Bore® HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shell: lead, steel and steel High Performance.

02

THE BEST RECOIL REDUCTION.

Kick-Off®, Kick-Off® Plus and Kick-Off® Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

03

UNBELIEVABLE RELOADING SPEED (+36%).

The Beretta gas-operating system is fast like an eye's blink. That's why it's called B-Link®. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

04

ALL-LOAD PROVEN RELIABILITY, FROM 24 TO 64 G.

Beretta gas-operating system B-Link® is the world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.

05

COMFORT AND EASY TO ASSEMBLE.

The Extralight® recoil pad is 30% lighter than a standard recoil pad and much more resistant to abrasion, aging and the elements. Its closed cell structure avoids liquid absorption and its structure delivers comfort, stability and excellent recoil absorption. The B-Lok® cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.

06

CLEANER THAN EVER AND EASIER TO CLEAN.

With B-Link®, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions reduce dirt to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

07

LOWEST MUZZLE JUMP.

Beretta semi-auto shotguns give you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off® devices with the unique ballistic features of the Steelium® Optima-Bore® HP barrels. More control after each shot, better performance for the next one.

08

ERGONOMIC AND EASY TO OPERATE.

The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitates an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.

09

DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.

The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

A400 Lite

A400 Lite Synthetic

See in AR

The Beretta A400 Lite is a hunting shotgun that does it all, and that doesn't mind playing hard and getting dirty. It's a 3" semi-auto shotgun combining the Kick-Off® Plus shock absorption, the unrivalled Beretta Steelium® barrels and a great package of smart, lightweight polymeric solutions. Fast, versatile, light and low-recoiling, the A400 Lite is also self-cleaning, requiring much less maintenance than you can expect.

Xtreme preparations, Xtreme conditions, Xtreme expectations.

The A400 Xtreme Plus is built to go wherever your hunt takes you. Engineered to be the softest-shooting, most reliable 3.5” waterfowl shotgun out there, and to withstand the toughest waterfowl environments. It has the best recoil and muzzle rise reduction system in the world: the Kick-Off® Mega, combining 3 hydraulic shock-absorbers and return springs to reduce recoil up to 70% and the B-Steady® system, avoiding the annoying sliding of the nose piece on the cheek, to let your face perfectly firm on the stock and never lose the line of sight. It features Beretta’s exclusive Steelium® Plus barrels, providing the best possible patterning from all hunting loads. An extended charging handle and bolt release from the factory allow for easier manipulation during the coldest and rainiest days. An enlarged loading port allows for ease of loading. The A400 Xtreme Plus shoots always, shoots everything and shoots even better!

Accessories

Beretta shotguns can be equipped with a wide range of accessories to take your hunting experience to its full potential. Complete your shotgun with Beretta products and live your passion to the fullest.

The **reliability** and **success** of Beretta rifles at the service of big game hunters.

The BRX1 is the fast, accurate and reliable linear reloading rifle that passed NATO validation tests usually performed on military weapons only.

With its locking system with rotating bolt head, superior ballistics, instinctive ergonomics and customization options, including the ability to quickly and easily convert it from right-handed to left-handed, the BRX1 is the right choice for those who want a high-level rifle for any kind of big game hunting.

BRX1

Beretta is stepping into the world of hunting rifles, offering a revolutionary firearm with a linear reloading system. BRX1 encapsulates all of Beretta's experience, acquired over years of working in both the military and commercial market. The BRX1 rifle guarantees the utmost speed, accuracy, safety and ease of use, from the first pull of the trigger to the reload.

The smoothness of reloading, the interchangeable barrels of varying calibers, three trigger weight options, fully ambidextrous bolt and extraction side with the possibility to change from right- to left-handed without any tool make the BRX1 a versatile, modern, modular firearm suitable for every kind of hunter and shooting environment.

DT11 Black DLC

DT11 Black DLC PRO Sporting

DT11 BLACK

Already packed with the renowned balance and performance features of the legendary DT11 over&under platform, this Black DLC iteration steps up with a renewed resistance and look. The DLC coating on receiver, trigger housing and barrel improves durability, resistance to corrosion and wear, while adding a modern black look, enriched by contemporary acid green details.

The Steelium® Pro barrel technology embodies the final signature for DT11 accuracy: an internal profile with triple forcing cone reaching up to 450 mm, reducing recoil and muzzle rise, while ensuring constantly dense and uniform shot patterns.

DT11 Pyramide Limited Edition

DT11 Pyramide Trap

DT 11 PYRAMIDE

Born after the DT11's unparalleled achievements in 14 years of all main clay target shooting international and local competitions, the DT11 Pyramide special edition features the reliability, balance and performance of the most victorious shotgun ever, combined with the timeless elegance of a geometric 3D pattern that transcends conventional excellence.
The DT11 Pyramide maintains the features that made DT11 the most successful shotgun platform for clay target shooting, but adds up a modern yet timeless and elegant look: the laser-engraved pyramid texture, obtained via a seamless 5-axis laser-engraving on 4 different intensity levels, provides the DT11 Pyramide's receiver with fine contemporary beauty, together with the micro-pyramid anti-glare pattern on the receiver shoulders and the mirror-polished hinge pins and ribbons.

DT 11

The most victorious shotgun ever. With DT11, balance, power and precision are in your hands, together with outstanding control and perfect trigger pull. The innovative Steelium® Pro barrels ensuring great pattern and reduced muzzle raise, the detachable trigger, the wide receiver improving stability and ease of handling and the B-Fast® adjusting devices make the DT11 the best competition over and under shotgun on the market. DT11 is assembled in Gardone Val Trompia, by the same skilled gunsmiths who work on Beretta fully customizable fine guns. Every DT11 model can be equipped with a made-to-measure stock upon request.

694 Pro Sporting

694

694 is the over&under platform designed specifically for clay shooting, and with a precise goal in mind: to help shooters increase their success rate. Thanks to a meticulous mechanical and ergonomic design process, the 694 is perfectly balanced, natural and immediate when shouldering. The shape of the action and the stock provide increased field of view, while the new forend iron system allows to maintain the opening load constant over time, and the Steelium® Plus barrels guarantee a dense, uniform pattern every time. In addition to the Sporting and Trap version, the 694 is available also in Skeet, Down-The-Line, ACS (with adjustable top rib), Vittoria and Pro version (with adjustable TSK® stock).

688 Performance

Top lever with smoother opening and closing feeling
B-Fast® adjustable stock
Fresh competition looks with improved anti-glare finish
Adjustable trigger, adjustable LOP
Thicker stock made for competition with palm swell, closed pistol grip and checkering

688
PERFORMANCE

The 688 Performance enhances shooters' comfort with a heavier receiver to improve stability, handling and minimize recoil. The laminated wood stock with palm swell, developed for competition, contributes to optimize weight distribution and balance. As an optional, it can include the B-Fast® adjustable technology straight out the box. The redesigned top lever ensures smoother feeling, requiring less effort to close and open the action.

The unbeatable ballistics of the Steelium® Optimabore® HP barrels with extended forcing cones provides the 688 with the long-established Beretta performance: uniform and dense patterns and minimized recoil and muzzle rise. All-in-one to enable shooters of all levels to think big right from the start.

687 Silver Pigeon V Sporting

687 Silver Pigeon V Sporting (B-Fast)

687 SILVER PIGEON V

The Silver Pigeon evolves with the V version: the efficiency, reliability and minimum maintenance requirements inherited from the 680 platform characterized by a new look together with a superior wood grade. The fine engravings are made using state-of-the-art premium laser technology and are embellished by a special sparkle in the bas-relief areas, which creates a pleasing contrast effect, highlighting the deep scroll motifs on the receiver, opening lever, trigger guard, locking shoulders, pins and forend release. The exquisite gloss finish enhances the grain of the stunning grade 3 walnut wood and protects it from rain and humidity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels.

687 Silver Pigeon III Sporting

687 Silver Pigeon III Sporting

687 SILVER PIGEON III

The 687 Silver Pigeon III shotgun represents an elegant evolution of the Silver Pigeon I, designed for shooters looking for the reliability and minimal maintenance requirements of the 680 platform, presented with attractive aesthetics and a superior wood finish. The fine game scene engraving is embellished by a special sparkle in the bas-relief areas for a pleasant contrast effect, while exquisite gloss finish enhances the grain of the stunning grade 2.5 wood, protects it from rain and improves longevity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels.

686 Silver Pigeon I Sporting

686 Silver Pigeon I Sporting

686 SILVER PIGEON I

The 686 Silver Pigeon I is Beretta's most popular over&under shotgun of all time. Based on the superb 680 platform, with its unmistakable low, slim action and legendary, ultra reliable mechanism; it won the hearts of shooting enthusiasts the world over. The 686 Silver Pigeon I incorporates the perfect ballistics of Beretta's highly reputed Steelium® Optima-Bore® HP barrels and it features a defined floral engraving, which is further enhanced with images of grapes on the vine and the iconic Beretta Three Arrows logo on both sides of the action. All of which combines to make the 686 Silver Pigeon I the most elegant, well-balanced and quick-to-shoulder, factory-made shotgun in the world.

MERCHANDISE

Accuracy, **power**, **speed**: these are the imperatives for a **practical shooter.**

Beretta's products designed for this discipline start from the strong base of the well-established 90 and 1301 platforms, but they have been internally redesigned alongside practical shooting champions to offer the best solutions for beating the clock and shooting down as many targets as possible.

Constant innovation work on ergonomics, balance, trigger and accessory compatibility has shaped Beretta pistols and shotguns to the shooter's needs: the great success of 92X Performance and 1301 Comp Pro and the results of the Beretta athletes who use them is a proof.

1301 Comp

1301 Comp

See in AR

1301 Comp

The Beretta 1301 Comp semiauto shotgun is designed to win tactical competitions right out of the box. Combining the technology of Beretta's best sporting shotguns with the requirements of the most demanding tactical shooters, it cycles faster than the other competition shotguns, handles like a dream and has oversized controls for super-easy operation.

It is available in two barrel lengths (53,5 and 61 cm) and its receiver is drilled and tapered for rail mounts, so that it can be equipped with optics or tactical aiming devices without any gunsmithing. And thanks to its Optima-Choke® HP interchangeable choke system, it can also be adapted for other uses and will always perform like a Beretta.

1301 Comp PRO

After gaining the podiums of the Shotgun World Championships with its incomparable cycling speed, the 1301 Comp evolves in the Pro version, incorporating the improvements suggested by the multi-rated Beretta shooters. With the comfort, stability and ease of shouldering of its stock, its super-fast, safe and easy loading system, the enlarged bolt release button and bolt handle and the Beretta by Tony System extended magazine for 10 + 1 cartridges, the 1301 Comp Pro is today the most competitive platform for practical shooting, already in its out-of-the-box configuration, yet allowing further personalization, so sought after by the most demanding shooters.

92X PERFORMANCE

The 92X Performance: accuracy, power and speed the #1ChoiceOfChampions way. The Beretta handgun specifically designed for competition does not accept compromises and aims to top performances, by bringing on the shooting ranges one of the most reliable locking systems ever, along with a full steel Vertec frame, a heavier Brigadier slide and the surprisingly fast and crisp Extreme-S® trigger mechanism. The 92X Performance is also available in the Defensive version, lightened, modified and now approved for IDPA and USPSA competitions and in the Optic version, red dot ready.

TACTICAL

For the great **challenges** of **yesterday.** And for those of **tomorrow.**

In 1915 Beretta launched its first semi-auto pistol. Today, with more than a hundred years of experience in the field, the new platforms are designed with a clear awareness of the needs of tactical and competition users and with constant attention to innovation.

At your side and in your hands **to win every fight.**

In any situation Beretta is always the answer: success in your hands. Our tactical guns are developed and tested with military and law enforcement professionals to guarantee the level of safety, accuracy and usability required by every tactical shooter. Built, developed and tested for those who come prepared to win.

80X CHEETAH

80X Cheetah Tactical

Beretta brings back to the market a super classic: a compact pistol in caliber .380 with exceptional comfort and style. The 80X Cheetah reimagines the legendary 84 platform, with a sleek design and enhanced features. Ergonomically redesigned, the 80X Cheetah includes a compact size, a snag-proof Vertec style grip profile, a smooth Double/Single trigger with crisp break, skeletonized hammer, a 13+1 round capacity, and comes optics-ready out of the box. With an easier-to-rack slide, lightened recoil from tuning of the slide weight, spring rates, and chambering in .380, the 80X Cheetah is designed with an enhanced fit and balance for elevated speed and control.

Px4 Storm

Px4 Storm

Absolute durability, reliability, and ergonomics have made it the go-to choice for shooters around the world. Designed to meet the most stringent military standards of durability, the PX4 has been reported to fire well over 150.000 rounds with zero part breakage. The lines of the pistol are snag-free and make unholstering and reholstering easy and fluid. The pistol may be adapted to different hand sizes and shooting styles thanks to a modular design with interchangeable backstraps. The ambidextrous and reversible controls offer the possibility to easily train or shoot with either hand. Besides being one of the strongest actions available, the rotary barrel dissipates recoil away from the shooter's hand and greatly reduces muzzle jump, making it an extremely fast and accurate. Disassembly is designed to allow for quick field stripping.

APX A1

The Beretta APX A1 encompasses the reliability and quality the APX family has become known for within the shooting communities. Years of extensive training and real-world use converge in a handgun designed and built for performance and maximum resistance. With a shorter and lighter trigger pull and tactile reset, the improved slide with aggressive serrations, the enhanced grip and its endless opportunities for RDO mount and further customization, the APX A1 creates ease of use for a wide range of end-users. Beretta APX A1 extends its range with its Compact version and with the Tactical version, with threaded barrel, suppressor height sights, wider magazine capacity and OD green frame.

1301 Tactical

The 1301 is Beretta's gas operated semi-automatic shotgun engineered to be ultra-reliable and easy to use. Thanks to its compact size, it is ideal for negotiating tight spaces. It has all the features that a modern tactical shotgun should offer and it is easily adaptable to most users' needs, body type and shooting posture. Right out-of-the-box, the 1301 Tactical features an oversized charging handle, large textured bolt release and an oversized reversible safety button. The integrated B-Link® gas operating system, featuring a cross tube gas piston, allows the 1301 Tactical to cycle 36% faster than any other shotgun on the market. This also makes it ideal for 3-gun competitions.

04

TECHNOLOGIES

Providing **innovation:** our **tradition** since 1526.

Every day, we are pushing the boundaries of research: our engineers are constantly working to find new and better solutions for our products, offering hunters and shooters all over the world the highest level of quality, performance and safety.

Creating value for every shooter through continuous research.

With more than 220 active patents and extensions, out of a total of about 1.400 registered, Beretta's R&D plays a central role in the innovation processes, being able to rely on particularly advanced computer-aided design and simulation systems.

All research, development and production activities are in-house up to product industrialization. In addition to ensuring ever-higher product performance, technical innovation allows us to optimize processes, reducing inefficiencies and ensuring the best quality/price ratio.

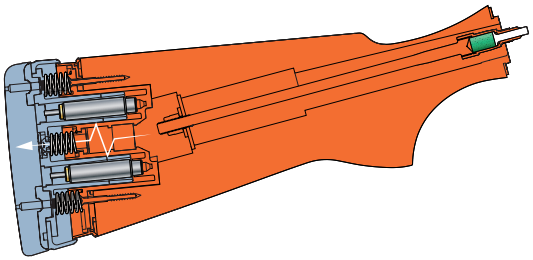
IM
CL-C

Kick-Off ®

World's best recoil and muzzle rise reduction

KICK-OFF

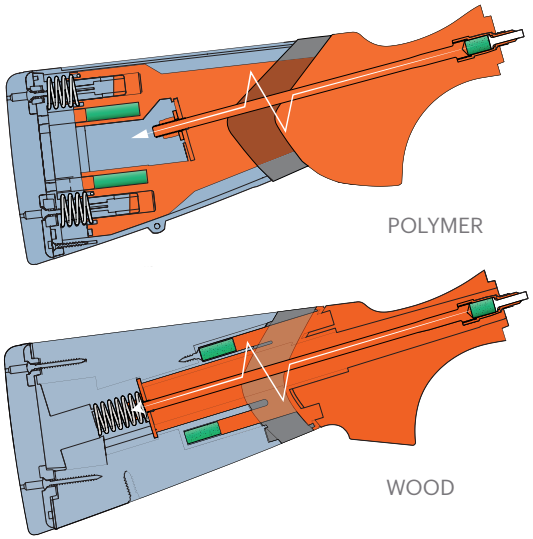
-60%



Kick-Off® is the first recoil reduction system developed by Beretta using hydraulic shock absorbers similar to those used in the automotive and aeronautical industries. It consists of two shock absorbers inserted close to the butt plate, completed by return springs, which effectively act on the first recoil peak, reducing the perceived recoil up to 60%. A third elastomer shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

KICK-OFF PLUS

-40%

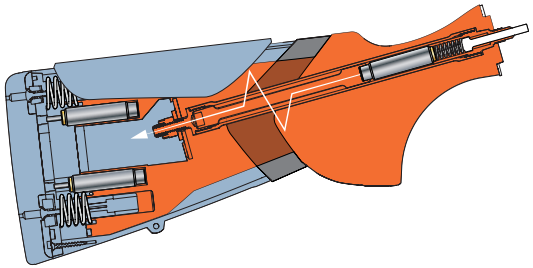


Kick-Off® Plus consists of two elastomer shock absorbers, positioned close to the rubber insert and equipped with return springs, which effectively act on the first recoil peak, reducing its perception up to 40%. A third elastomer shock absorber, inserted in the tie rod, absorbs the impact of the slide against the receiver, reducing the second recoil peak, the muzzle rise effect and the vibrations caused by the movement of the slide.

FIXED PART MOVING PART

KICK MEGA OFF

-70%



Kick-Off® Mega is the most powerful recoil reduction system available today, ideal for 89mm chambered shotguns, especially when you enjoy shooting high loads and hundreds of shots in a single day. It effectively combines 3 different devices that work synergistically, reducing the perceived recoil by up to 70%, ensuring greater stability, better control and faster target acquisition. Two hydraulic shock absorbers, similar to those used in the automotive and aerospace industry, positioned close to the rubber insert, together with return springs, effectively act on the first recoil peak. A third hydraulic shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

B STEADY

The **B-Steady®** system divides the stock into two sections: stock and pistol. The point of absorption of the recoil is in an advanced position, integral with the pistol, which is free to move back, leaving the stock stable and avoiding the annoying sliding of the nose piece on the cheek. The face remains firm and perfectly steady on the stock, without ever losing the line of sight.

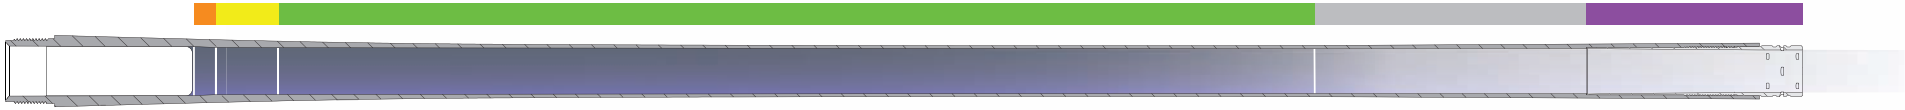
FIXED PART MOVING PART

Steelium®

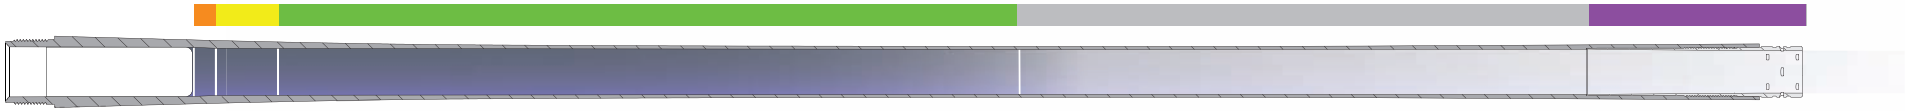
The best ballistic performance on the market

STEELIUM PRO X — TRIPLE CONE about 430mm* — CYLINDER SECTION — OCXP Choke, 90mm

STEELIUM PRO — TRIPLE CONE about 450mm* — CYLINDER SECTION — OCHP Choke, 70mm



STEELIUM PLUS — TRIPLE CONE about 320mm* — CYLINDER SECTION — OCHP Choke, 70mm



STEELIUM — DOUBLE CONE about 80mm — CYLINDER SECTION — OCHP Choke, 70mm

* The indicated lengths are based on 76 cm barrels.

The ingredients for the stunning performance of the Beretta **Steelium® barrels** are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging, the vacuum distension and the 80 mm extended forcing cone. The inner profile of the Optima-Bore® HP barrels has been designed and tested to provide perfect accuracy with every type of shells: lead, steel and High Performance steel. This results in perfect patterns on every shot.

The **Steelium® Plus** barrels have a triple forcing cone that reaches a length of 320 mm (in a 76 cm barrel). In **Steelium® Pro** barrels, the length of the forcing cone is further extended, up to 450 mm (in 76 cm barrels). With the reduction of the bore diameter, and the new proportion between forcing cone and chockes, **Steelium® ProX** barrels chart a new course in performance with a further advance in barrel technology. This progressive inner profile of the barrel provides smoother shot with reduced muzzle rise and guarantees perfect, dense and uniform patterns with any type of ammunition.

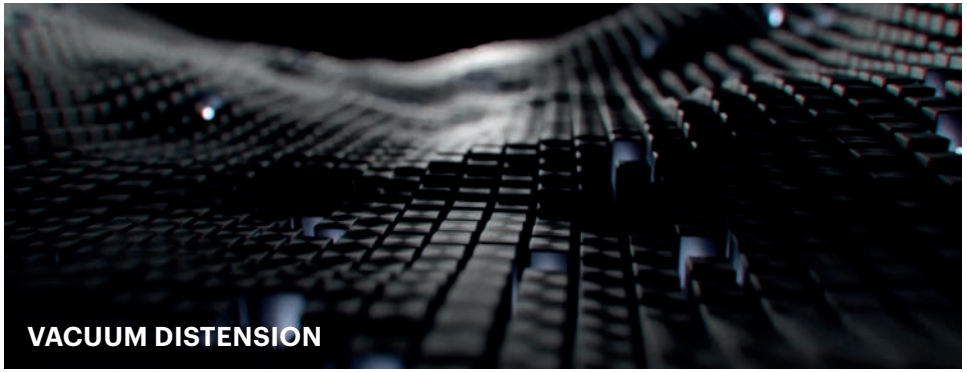
COLD HAMMER FORGING

TRI-ALLOY STEEL



VACUUM DISTENSION

DLC

Coating technology, diamond-like carbon

DLC is a thin film of amorphous carbon that, when gets in touch with some materials such as steel, transfers to it many of the beneficial properties commonly associated with natural diamonds, i.e. hardness and resistance to chemicals and scratches. Already used in several technologically advanced industries such as automotive, medical, and racing, DLC is now the most durable, innovative, and environmentally friendly coating Beretta applies to its products. Compared with the treatments previously adopted, DLC offers important advantages that make the coated firearm very resistant:

· Very high resistance to corrosion and alkaline or acidic solutions, including acidic palm sweat that increases the risk of leaving marks on barrels

· Strong resistance to ageing and rust for a very long-lasting life

· Remarkable anti-scratch and anti-shock properties due to the hardness characteristics typical of natural diamond

For its application, DLC does not involve the use of solvents or dangerous substances: this makes it also non-toxic and environmentally neutral.

LEGAL NOTES: while every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in the illustrations, descriptions, colors shown, and technical specs listed. Beretta provides ongoing improvements to its products and consequently, all specifications can vary without notice.
